2 of 40

Which of the following approach towards testing includes trial techniques and error guessing method because tester does not need knowledge of internal coding of the software?

- 1 White Box Testing
- 2 Grey Box Testing
- 3 O Black Box Testing
- 4 Red Box Testing

Solution -

Black Box Testing

3 of 40

The elements of the software architecture of a computing system include

- 1. software components
- 2. class diagrams
- 3. connectors expressing relationships between software components
- 4. entity relationship diagrams
- 1 0 1 & 2
- 2 0 1 & 3
- 3 0 1,3 & 4
- **4 0** 1, 2, 3 & 4

Solution -

1,3 & 4

4 of 40

Cloud Service consists are:
1 O Platform, Hardware, Infrastructure
2 Platform, Software, Infrastructure
3 O Software, Infrastructure, Hardware
4 O Software, Hardware, Infrastructure
Solution -
Platform, Software, Infrastructure
5 of 40
requirement analysis
1 O delivers a system in a series of versions
2 O organizes abstraction
3 O builds a bridge between user and developer
4 O uses experimental software to better understand user requirements
Solution -
builds a bridge between user and developer
6 of 40
Which is not a type of maintenance?
1 Adaptive
2 Corrective
3 Perfective

4 O Ob	solescence 🗸
Solutio Obsolesce	
7 of 40 When to Us	se The V Model?
2	he requirement is well defined and not ambiguous acceptance criteria are well defined. echnology and tools used are not dynamic. of the above
Solutio All of the a	
pressure of	ng is carried out to check whether the system can handle the r load of many users is an example of nctional n-functional testing
3 O Uni	it Testing of the above

Non-functional testing

9 of 40 COCOMO is an effort estimation model in terms of	
1 O Cost	
2 O Person- Months	
3 O Both	
4 None of the above	
Solution -	
Person- Months	
10 of 40 Final Function point count calculated for project will result in the smallest LOC if implemented in	
1 Assembly ✓ 2 O C	
3 O C++	
4 O Visual basic	
4 O Visual basic	
4 O Visual basic Solution -

What is the major drawback of using RAD Model?

Highly specialized & skilled developers/designers are required 🗸

- Increases reusability of components
- Encourages customer/client feedback

Increases reusability of components, Highly specialized & skilled developers/designers are required

Solution -

Highly specialized & skilled developers/designers are required

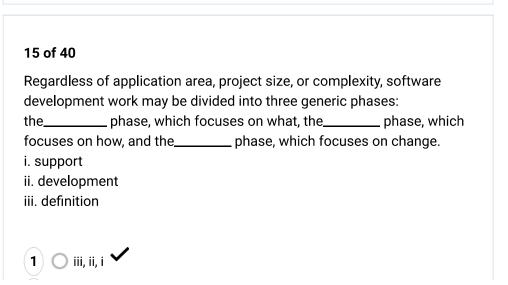

13 of 40

Arrange the following activities in Risk Assesment in the correct sequence

- a. Prioritization
- b. Identification
- c. Analysis

1 O b, a, c		
2 O b, c, a		
3		
4 O c, a, b		
Solution -		
b, c, a		
b, c, a		

14 of 40 Chief Programmer Teams are suitable for projects 1 with research orientation 2 with high modularity 3 with high creativity 4 None of the above Solution with high creativity

- (2) () iii, I, ii
- 3 O I, ii, iii
- 4 O ii, I, iii

iii, ii, i

16 of 40

Ability to deal with exceptional conditions e.g. invalid input, improper handling, power failure, disk crash etc.

- 1 C Effeciency
- 2 Robustness 🗸
- **3** Reliability
- 4 O Correctness

Solution -

Robustness

17 of 40

What manifests in the patterns of choices made among alternatives ways of expressing an algorithm is

- 1 a data flow diagram
- 2 ocoding style
- 3 a data dictionary
- 4 None of the above

coding style

18 of 40

What is true about distributed tracing used in microservices?

- 1 It ensure that failed microservices are resurrected properly
- 2 It transfer log management between a given host on demand
- (3)
- It observe the behavior of distinct system calls between and within
- microservices
- (4) O It change the behavior of a microservice at runtime

Solution -

It observe the behavior of distinct system calls between and within microservices

19 of 40

When the user participation isn't involved, which of the following models will not result in the desired output?

- 1 Prototyping & Waterfall
- 2 Prototyping & RAD
- 3 Prototyping & Spiral
- 4 RAD & Spiral

Solution -

Prototyping & Waterfall

20 of 40 is now one of the most widely used software development processes. 1 ○ V model 2 ○ Waterfall STLC model ✓ 3 ○ Both A and B
Solution - Waterfall STLC model
21 of 40 Which of the following model is a software enterprise development phrase used to signify a kind of Agile relationship among development and IT operations. 1 ○ Waterfall 2 ○ DevOps ✓ 3 ○ Agile 4 ○ Incremental
Solution - DevOps

The sysadmir	ne has four CPUs available and two running containers. n would like to assign two CPUs to each container. Which ng commands achieves this?			
1				
Set the '	cpuset-cpu's flag to '1.3' on one container and '2.4' on the other			
container.				
2 O Set th	e 'cpuset-cpus' flag of the 'dockerd' process to the value 'even			

/2/2		rus Solutions - Leading online
	Set the 'cpu-quota' flag to '1.3' on one container	and '2,4' on the other
	container. Set the '-cpuset-cpus' flag to '.5' on both cont	ainers
	Solution -	
	Set the 'cpuset-cpu's flag to '1.3' on one containe container.	r and '2.4' on the other
	25 of 40	
	Find the correct sequence used in Jenkins for a copipeline.	ontinuous delivery
	1 build, deploy, release and test	
	2 build, deploy, test and release	
	3 O build, test, deploy and release	
	4 test, build, deploy and release	

build, test, deploy and release

26 of 40

Which of the following isn't a goal of NewOps?

1 O Serving as an interface between cloud providers and customers.
2 Integrating different operations teams like storage, network, server etc.
by removing silos and be aligned with business
By automating operations, remove the need for human competencies.

(4) O None of the above

Solution -

By automating operations, remove the need for human competencies.

27 of 40

What is a microservice?

- A design used primarily in functional programming and object-oriented

 programming

 A style of design for enterprise systems based on a loosely coupled
- component architecture
- A small program that represents discrete logic that executes within a well
- (4) O A very small piece of code that never gets any bigger than 10 lines

Solution -

A style of design for enterprise systems based on a loosely coupled component architecture

28 of 40

Which of the following software is perfect for software teams in need of advanced agile functionality and structured workflow?

- 1 O JIRA
- 2 O Visual studio
- 3 C Eclipse
- 4 O Trello

JIRA

29 of 40

Which one of these statements is true?

- 1 git pull does not modify the local branch tip.
- 2 git fetch does not update the local branch tip.
- **4** O Behavior of git fetch and git pull are same

Solution -

git fetch does not update the local branch tip.

30 of 40

_____ allows one to attach to a container without exiting the container.

- 1 Onsenter
- 2 O docker run
- 3 omder
- 4 None of the above

Solution -

nsenter

31 of 40 Which plugin is used to run the selenium test cases in Jenkins?
1 O Hudson
2 O JUnit 🗸
3
4 O Nunit
Solution - JUnit
32 of 40
4GT Model is a set of
1 O Programs
2 CASE Tools
3 O Software tools
4 None of the above
Solution -
Software tools
33 of 40 is a human-friendly data serialization language for all
programming languages.

3 YAML 4 JSON Solution - JSON 34 of 40 The goal of is to obtain a clear understanding of the system and its shortcomings and to determine opportunities for improvement 1 Feasibility study 2 systems analysis 3 systems definition 4 systems study Solution - systems analysis 35 of 40 Which of the cloud service models available is used as the foundation upon which operating systems and software are hosted? 1 SaaS 2 laas 2 laas 4 CaaS	2 XML
